

International Symposium on Clusters and Nanomaterials (Energy and Life Sciences Applications)

October 26-29, 2015

Richmond, Virginia, USA

Host : Virginia Commonwealth University

Scope

This interdisciplinary symposium, a continuation of the Richmond Conference series, will focus on the unique properties of materials at the nanoscale with emphasis on energy and life sciences applications. In addition to invited talks and poster sessions the symposium will feature “hot-topics” to be selected from contributed abstracts for oral presentation.

Topics

Energy: Hydrogen, thermoelectrics, solar, electrochemical storage, energy conversion, and catalysis.

Life Sciences: Bioactive, bio responsive and biomimetic materials; self-assembly; nanotoxicity; bio-engineering; and regenerative medicine.

Chairman: Puru Jena (VCU) Secretary: Anil K. Kandalam (VCU)

International Advisory Board

B. D. Boyan (USA)

A. W. Castleman, Jr. (USA)

W. Eberhardt (Germany)

J. S. Francisco (USA)

W. Kohn (USA)

Z. F. Liu (China)

R. M. Nieminen (Finland)

G. A. Somorjai (USA)

C. Bréchnignac (France)

M. S. Dresselhaus (USA)

M. A. El-Sayed (USA)

S. Iijima (Japan)

N. Lewis (USA)

C. A. Mirkin (USA)

C. N. R. Rao (India)

J. T. Yates, Jr. (USA)

Organizing Committee

P. M. Ajayan (Rice)

C. M. Cannizzaro (DOS)

M. S. El-Shall (VCU)

J. Poon (UVA)

J. T. McLeskey (VCU)

J. E. Reiner (VCU)

S. S. Tinkle (STPI)

K. H. Bowen (JHU)

H. El-Kaderi (VCU)

D. Farkas (VA Tech)

S. D. Mahanti (MSU)

J. C. Reed (VCU)

Q. Sun (Peking U)
